## Summary

I'm an image processing scientist that recently received an MSc in Medical Biophysics. I worked on novel imaging pipelines and image quality evaluation metrics for faster MRI scar mapping in patients with ventricular tachycardia. I am most proficient in Python.

## Skills

<b>Programming</b>	Proficient: Python. Comfortable: Pytorch, Pandas, Pillow, Matlab, Git. Some Experience: Java, Javascript, LaTeX
<b>Research</b>	Project-based work, Scientific and Technical Writing, Data Analysis, Operating an MRI Scanner
<b>Science</b>	Image Processing, Signal Processing, Machine Learning, Medical Imaging, Physics, MRI Physics

## Education

### M.Sc. in Medical Biophysics

Toronto, Canada

UNIVERSITY OF TORONTO

January 2018 - September 2021

- Reduced scan times for MRI scar mapping in ventricular tachycardia patients by over 70% by implementing novel, underutilized imaging pipelines and reconstruction techniques. Mainly used Python with some development in Matlab and Javascript.

### B.Sc. in Physics, with Distinction

Kingston, Canada

QUEEN'S UNIVERSITY

September 2013 - June 2017

- Undergraduate thesis: Investigated rotational dynamics of disk galaxies by simulating them as a series of concentric massive rings which interact with one another gravitationally. This was to model the disk warping of galaxies such as [UGC 3697](#)

## Work Experience

### Sunnybrook Research Institute

Toronto, Canada

RESEARCH SCIENTIST

September 2021 - Present

- Developed two novel MRI sequences using the Javascript-based MRI platform 'RTHawk' by HeartVista to enable faster data acquisition in time-sensitive scans
- Created image quality evaluation metrics for comparing novel imaging pipelines against the clinical standard to validate results. These included measurements for image sharpness and signal-to-noise comparisons
- Developed a deep learning model to automatically segment lungs in chest images, enabling a future collaboration with a startup interested in using patient specific lung geometry
- Engaged with patients while operating the MRI scanner to ensure a good experience for them

### Queen's University

Kingston, Canada

RESEARCH ASSISTANT

May 2016 - September 2016

- Organized and preprocessed data for a research lab investigating chronic kidney disease in rat models
- Evaluated the lab's data analysis needs and carried out the transition to Microsoft Access for database functionality
- Interacted with animals to perform daily data collection

## Awards

2018-2019 **Queen Elizabeth II Graduate Scholarship in Science and Technology**, U of T and Province of Ontario

2019-2020 **Queen Elizabeth II Graduate Scholarship in Science and Technology**, U of T and Province of Ontario

## Extracurricular Activity

### Social Committee President

Toronto, Canada

GRADUATE STUDENT ASSOCIATION

January 2018 - January 2020

- Improved the graduate student experience by organizing social and networking events for students in the Department of Medical Biophysics
- Determined the best use of the events budget and developed strong interpersonal skills

### Let's Talk Physics Symposium Co-organizer

Kingston, Canada

LET'S TALK SCIENCE

December 2016

- Led a team of physics students in organizing a successful science outreach effort hosting over 200 local high school students
- Was featured in a local newspaper article [here](#)
