Summary

I'm an image processing scientist that recently received an MSc in Medical Biophysics. I worked on MRI imaging pipelines and image quality evaluation metrics for faster MRI scar mapping in patients with ventricular tachycardia. I am most proficient in Python.

Skills

Programming	Proficient: Python (2 years) . Comfortable: Pytorch, Pandas, Matlab, Git. Some Experience: Java, Javascript, C, Docker, TeX
Research	Project-based work, Scientific and Technical Writing, Data Analysis, Operating an MRI Scanner
Science	Image Processing, Signal Processing, Machine Learning, Medical Imaging, Physics, MRI Physics

Education

M.Sc. in Medical Biophysics

[Toronto, Canada](#)

UNIVERSITY OF TORONTO

January 2018 - September 2021

- Reduced scan times for MRI scar mapping in ventricular tachycardia patients by over 70% by implementing new or underutilized image processing pipelines and reconstruction techniques. Mainly used Python with some development in Matlab and Javascript.

B.Sc. in Physics, with Distinction

[Kingston, Canada](#)

QUEEN'S UNIVERSITY

September 2013 - June 2017

- Undergraduate thesis: Investigated rotational dynamics of disk galaxies by simulating them as a series of concentric massive rings which interact with one another gravitationally. This was to model the disk warping of galaxies such as [UGC 3697](#)

Work Experience

Sunnybrook Research Institute

[Toronto, Canada](#)

RESEARCH DEVELOPER

September 2021 - Present

- Developed two MRI sequences using the Javascript-based MRI platform 'RTHawk' by HeartVista to enable faster data acquisition in time-sensitive scans
- Created image quality evaluation metrics for comparing novel imaging pipelines against the clinical standard to validate results. These included measurements for image sharpness and signal-to-noise comparisons
- Developed a deep learning model to automatically segment lungs in chest images, enabling a future collaboration with a startup interested in using patient specific lung geometry
- Engaged with patients while operating the MRI scanner to ensure a good experience for them

Queen's University

[Kingston, Canada](#)

RESEARCH ASSISTANT

May 2016 - September 2016

- Organized and preprocessed data for a research lab investigating chronic kidney disease in rat models
- Evaluated the lab's data analysis needs and carried out the transition to Microsoft Access for database functionality
- Interacted with animals to perform daily data collection

Awards

2018-2019 **Queen Elizabeth II Graduate Scholarship in Science and Technology**, U of T and Province of Ontario

2019-2020 **Queen Elizabeth II Graduate Scholarship in Science and Technology**, U of T and Province of Ontario

Extracurricular Activity

Social Committee President

[Toronto, Canada](#)

GRADUATE STUDENT ASSOCIATION

January 2018 - January 2020

- Improved the graduate student experience by organizing social and networking events for students in the Department of Medical Biophysics
- Determined the best use of the events budget and developed strong interpersonal skills

Let's Talk Physics Symposium Co-organizer

[Kingston, Canada](#)

LET'S TALK SCIENCE

December 2016

- Led a team of physics students in organizing a successful science outreach effort hosting over 200 local high school students
- Was featured in a local newspaper article [here](#)
